

Envision Release 4.6.0.0- Builders

Drag and Drop Option Placement Feature

It's finally here! This feature will allow you to assign icons to an option. That icon can be dragged and dropped on a floor plan image to show visibly see where that options should be installed in the home. This will be really helpful for electrical options, but can be used for any option that is available in Envision. These images with the options placed can then be printed right from the page or as part of the contract addendum for the buyer to keep.

Read on to learn the setup and capabilities of this new feature:

Upload Floor Plan Images

A new image type added to be able to upload images specific to this feature to display in the floor plan tab in the DCM.

- Can be manually uploaded at the **plan** level or the **home** level
- Can be sent in via Web services (must specify that it is a floor plan image)
- The caption is required as this will be used for the image name on the floor plan tab in DCM
- File types include JPEG, GIF, PNG, TIFF and we have added support for **SVG** files

The screenshot shows the 'Inventory Images' section of the Envision software. At the top, there is a green header bar with the text 'Inventory Images' and a 'Help' button. Below the header, there is a checkbox labeled 'Lock these images from automated-feed changes'. The main content area is divided into three sections: 'Gallery 1 Images', 'Gallery 2 Images', and 'Floor Plan Images'. Each section has a table with columns for 'Position', 'Thumbnail', 'Caption', 'Location', and 'Status'. Below each table, there is a message indicating that no images have been added. The 'Floor Plan Images' section is currently selected. Below the 'Floor Plan Images' section, there is a 'Add New Image' form. The form has three radio buttons: 'Gallery 1', 'Gallery 2', and 'Floor Plan'. The 'Floor Plan' radio button is selected and highlighted with a red box. The form is divided into two columns: 'Upload File' and 'Enter URL'. The 'Upload File' column has a text input for 'Image File' (currently showing 'No file selected') and a 'Caption' input field, which is also highlighted with a red box. The 'Enter URL' column has a text input for 'Image URL' (currently showing 'http://') and a 'Caption' input field. Both columns have an 'Add' button at the bottom. At the very bottom of the form, there is a 'Save' button.

Assign Icons to an Option

A new section on each option to be able to designate an icon.

- Activate the option for placement
- Select an icon from an extensive library of icons with multiple color choices
- Type ahead search to quickly locate icons
