

# Envision Release 4.8.0.0- Builders

## DCM: Designer Collections Available

This feature will make the Designer Collections available to view and select from in the DCM.

### Determine Display Location

Designer Collections will be created the same way they currently are, but will now have the option to display in DCM, EDC or Both. Additionally, there is the ability to Select All on the Association tab to quickly associate the Designer Collection with all plans/communities with just one click.

- If the Designer Collection is selected to display in ECD or Both, it will require an image.
- For DCM only, no image is required

### DCM – Designer Collections – Basic Information

Search Buyers

> Create Designer Collection: Basic Information

Basic Information | Association | Option Selection | Option Customization

Step 1: Provide the basic information for the Designer Collection.

**Collection Creation Level**

Note: Owner cannot be edited after collection creation. All plans under collection creation level must either be room-enabled or not use rooms at all.

Display ☒ EDC Only ☐ DCM Only ☐ Both

### DCM – Designer Collections – Association

Basic Information | Association | Option Selection | Option Customization

Step 2: Associate the collection with the inventories of your choice.

Note: The collection must be associated with Plan/Elevation level for the buyer to view it.

Select all Desired Levels:

☒ Select All

- CASPIAN RUN COMMUNITY
  - ☐ 1A - CASPIAN RUN
  - ☐ 1B - CASPIAN RUN
  - ☐ 1C - CASPIAN RUN
  - ☐ 1D - CASPIAN RUN
  - ☐ 1E - CASPIAN RUN
  - ☐ CAPSIAN RUN PLAN

**Filter Inventory List**

☐ Associated

☐ Non-associated

☒ All

## DCM – Add Selections Tab

When selected to Display in the DCM an additional filter will be added. Selecting the Designer collection will filter to all options associated with that designer collection.

## EDC2.0 Manufacturer Logo Display

Once drilled down to the lowest category level, the branding for all manufacturer products available in those options will display as a banner at the top of the page. This will give buyers that brand recognition and make them more familiar with the options they are viewing.

## DCM: QR Code Scanner

The QR Code Scanner has been updated to live within the DCM application instead of needing a QR Code Scanner app to be downloaded. There are two versions of the scanner integrated in the DCM.

- For newer model browsers/Operating Systems – the QR code scanner will be a point and scan
- For older/unsupported browsers/Operating System – the QR code scanner will require a photo to be taken of the QR code in order to scan it.
- \*\*The device that is being used will detect and automatically determine which version to use\*\*

The screenshot shows the 'Manage Checklist' screen in the DCM application. The left sidebar contains navigation options: Design Center Home, Manage Buyers, Create New Buyer, Create New Home, Manage Homes, Manage Buyers, Design Library, Manage Design Library, Manage Content, and Reports. The main content area displays details for 'Modern3, Nicole' with fields for Lot/Plan, Community, Address, Home No, and Base Home Price. A red box highlights the QR code scanner icon in the top right corner of the header bar.

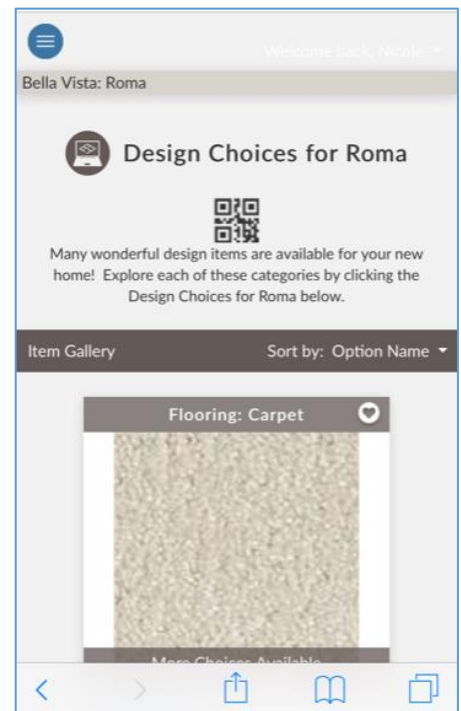

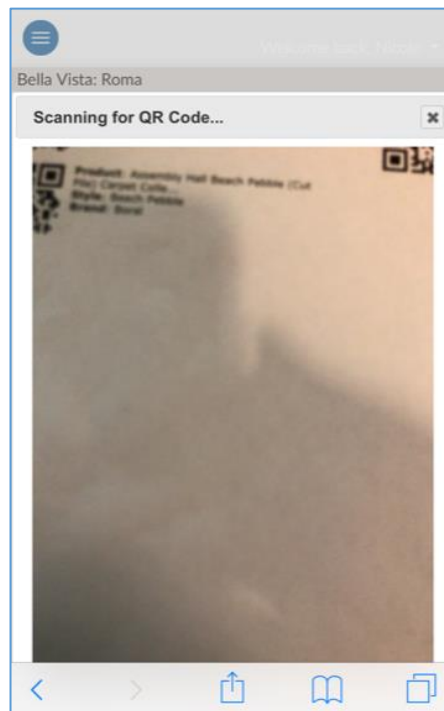

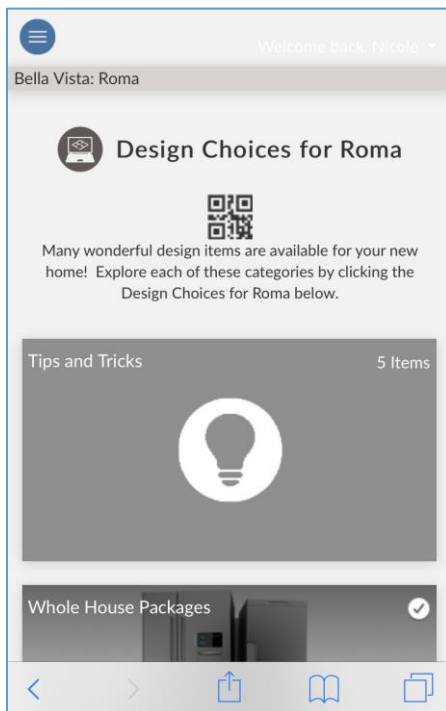

## Additional Updates

- Additional fixes to the Option Placement on a Floor Plan feature
- OM web feed update to allow new Floor Plan Type image upload
- EDC: Clicking on categories in To View and Viewed on Dashboard fixed to not freeze
- Extra Blank Page on Print Out of Confirmed Selections eliminated

## What's next?

### QR Code Reader in EDC

When the QR Code reader is enabled, the Buyers will be able to access the scanner from EDC2.0.

### Packages in Visualizer

Currently the visualizer works where only one product in one area can be updated at a time. This new feature will allow the creation of packages where the user can click on a package and see multiple products display in the visualizer together (example Kitchen Package includes Cabinets, Countertops and Backsplash).
